

FAYSAL HUSAAIN

GoHighLevel Developer | Funnel & Marketing Automation Expert

Lahore, Pakistan | faysalhusaain@gmail.com | +92 321 9316391 | linkedin.com/in/faysalhusaain

PROFESSIONAL SUMMARY

GoHighLevel developer and funnel builder with 7+ years of freelance experience. Work covers white-label GoHighLevel SaaS setups for agencies, funnel migrations from ClickFunnels and Kajabi to GoHighLevel, and workflow automation using Zapier and Make. Clients based mostly in the US, UK, EU, and Middle East.

TECHNICAL SKILLS

CRM & Marketing Automation: GoHighLevel (Agency, SaaS Mode, White-Label, DMA Marketplace), Workflow Builder, Trigger Links

Funnel & Website Platforms: ClickFunnels, ClickFunnels 2.0, Kajabi, GoHighLevel Funnels, WordPress

Integration & Automation Tools: Zapier, Make (Integromat), webhook integration

Web Development: HTML, CSS, JavaScript, custom code injection inside GoHighLevel and ClickFunnels

Payments & Scheduling: Stripe, PayPal, GoHighLevel calendars and booking systems

Specialized Work: White-label SaaS setup, ClickFunnels and Kajabi migrations to GoHighLevel, snapshot creation, agency onboarding automation

PROFESSIONAL EXPERIENCE

Freelance GoHighLevel Developer & Funnel Builder

May 2022 – Present

Self-Employed (Remote) | Serving Clients Globally

- Completed 100+ GoHighLevel projects for agencies, coaches, course creators, and SaaS founders.
- Built white-label GoHighLevel SaaS systems for agencies. Configured SaaS Mode, sub-account templates, snapshots, and subscription tiers so the agency can resell GoHighLevel under their own brand.
- Migrated full funnels from ClickFunnels and Kajabi to GoHighLevel. Kept tracking pixels, email sequences, automation logic, and payment flows intact through the migration.
- Coded custom HTML, CSS, and JavaScript components inside GoHighLevel funnels, including animated steppers, testimonial carousels, feature tab sliders, and image-swap accordions. Hard-coded DOM elements to work around platform limitations like the iframe rendering bug.
- Designed workflow automations connecting GoHighLevel with Zapier, Make, Stripe, and external CRMs through webhooks. The automations handle client onboarding, lead nurturing, calendar booking, and payment processing.
- Advised agency founders on system design to reduce client churn through better automation and reusable snapshot libraries. Identified security and code quality issues in inherited client setups, including a malicious script disguised as a Facebook Pixel.

Web Developer

February 2020 – September 2025

Conversion Elevation | Lahore, Pakistan (Remote)

- Built and optimized landing pages and conversion-focused websites for clients in coaching, e-commerce, and service business niches.
- Developed responsive WordPress and custom-coded websites, integrating them with CRM platforms and email marketing tools to complete the client's marketing funnel.
- Worked with marketing teams to turn campaign briefs into sales funnels, opt-in pages, webinar registration flows, and product launch sequences.

Freelance Web Developer & Funnel Builder

March 2019 – May 2022

Self-Employed (Remote) | Lahore, Pakistan

- Built marketing funnels on ClickFunnels, WordPress, and Kajabi for coaches, service businesses, and digital product creators.
- Set up Stripe and PayPal payment flows, email automation, and CRM integration for clients launching online courses, coaching programs, and subscription products.

NOTABLE PROJECTS

Custom GoHighLevel Website Build for a Marketing Agency

Recreated a complex multi-section website inside GoHighLevel using custom HTML, CSS, and JavaScript. Built an animated stepper, testimonial carousel, feature tab slider, and image-swap accordion. Resolved a GoHighLevel iframe rendering bug by hard-coding DOM elements so the carousel displayed correctly.

ClickFunnels to GoHighLevel Migration for a Coaching Business

Migrated a full sales funnel from ClickFunnels to GoHighLevel, including landing pages, sales pages, order forms, payment integration, and email sequences. Kept existing tracking pixels, conversion data, and automation logic intact through the migration.

White-Label SaaS Launch for a Marketing Agency

Set up GoHighLevel SaaS Mode for the agency, including sub-account templates, snapshot architecture, and tiered subscription plans. Configured agency branding, custom domain, and Stripe payment integration so the client could resell GoHighLevel under their own brand.

EDUCATION

Bachelor of Science in Computer Science

March 2014 – May 2019
